

The background is a dark blue gradient with a subtle pattern of white dots. On the left side, there are several concentric circles and a large circular scale with degree markings from 140 to 260. Some of the circles have arrows indicating a clockwise direction. The title text is positioned on the right side of the image.

PRISM+ CURRENT PERFORMANCE ANALYSIS

EXECUTIVE SUMMARY

- Project uses a business-centred analysis between Prism+ members and non-members to assess performance of pilot customer loyalty scheme
- Prism+ is an unprofitable system of diminishing returns for high-purchasing customers.
- Platinum-tier customers are the most expensive group, with low ABV and profit margins and no difference in performance with active customers compared to control. Only AOF and arguably Return Rate are its strong points.
- All benefits could be better achieved with Gold-tier maximum or cut discounts in half.
- Best move away from discount-based customer loyalty system for a sustainable rewards-based scheme, or rethink means to retain customers before implementing a loyalty scheme.

NECESSARY CONTEXT – CUSTOMER POPULATION

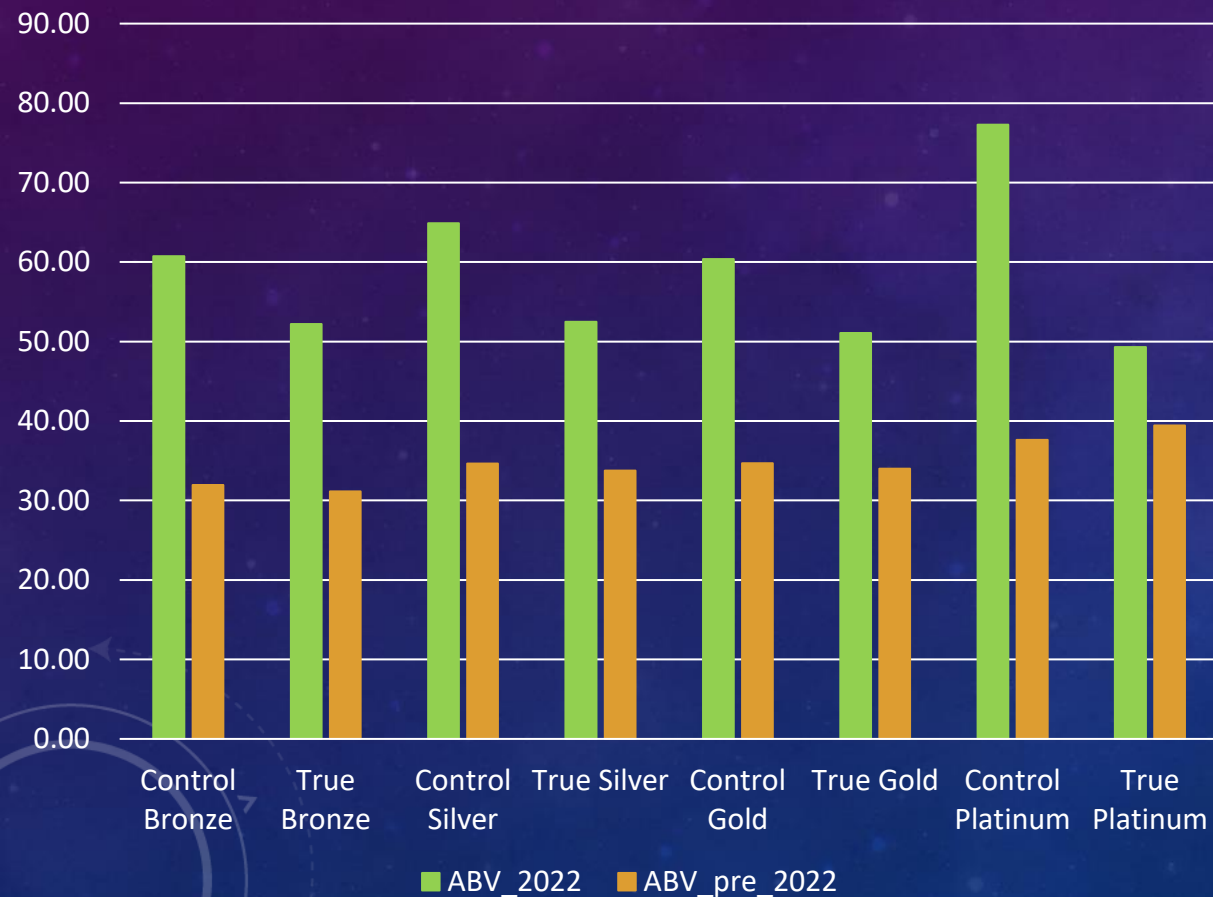

Prism+ ABV is
lower than
non-members

PRESENT STATE OF PRISM+ ABV AND AOF

Prism+ AOF is
increasing
compared to
non-members

ABV (£)

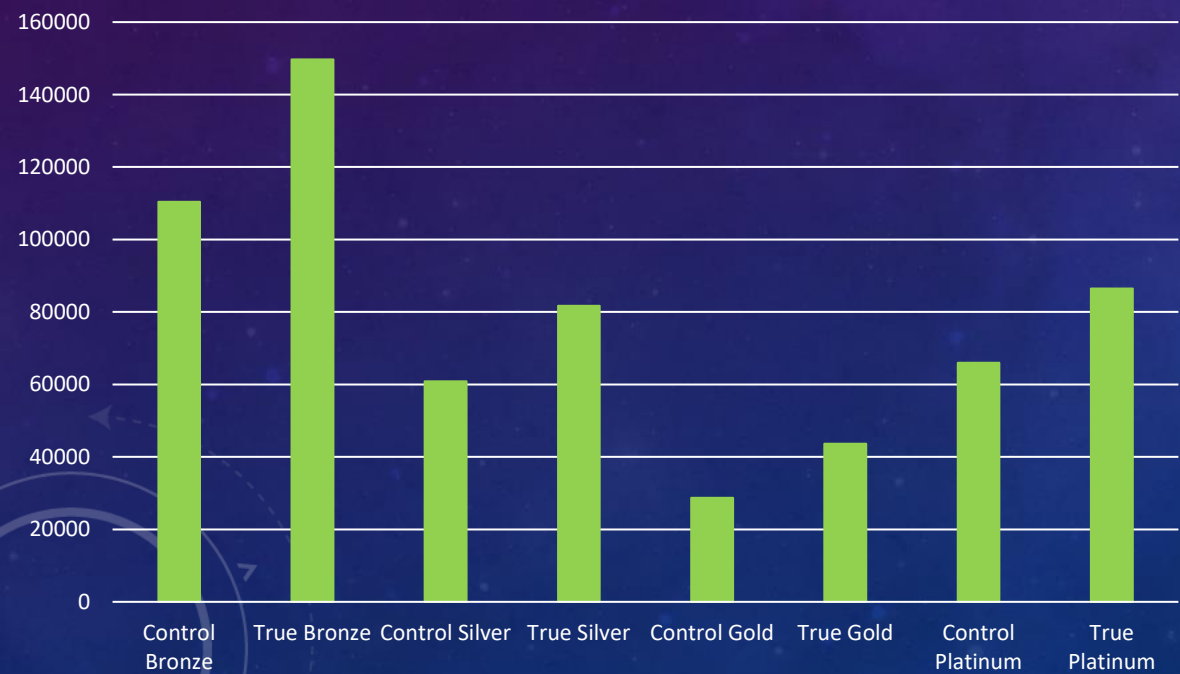

AOF

HIGH PROFITS - LOW MARGINS

Prism+ profit margins
are lower than non-
members and even
from last year

Total profits per Prism+ tier

Profit margins between customer groups before and during 2022

LOST PROFITS

- COSTLY DISCOUNTS

Tiers:

- Bronze: 5%
- Silver: 10%
- Gold: 15%
- Platinum: 20%

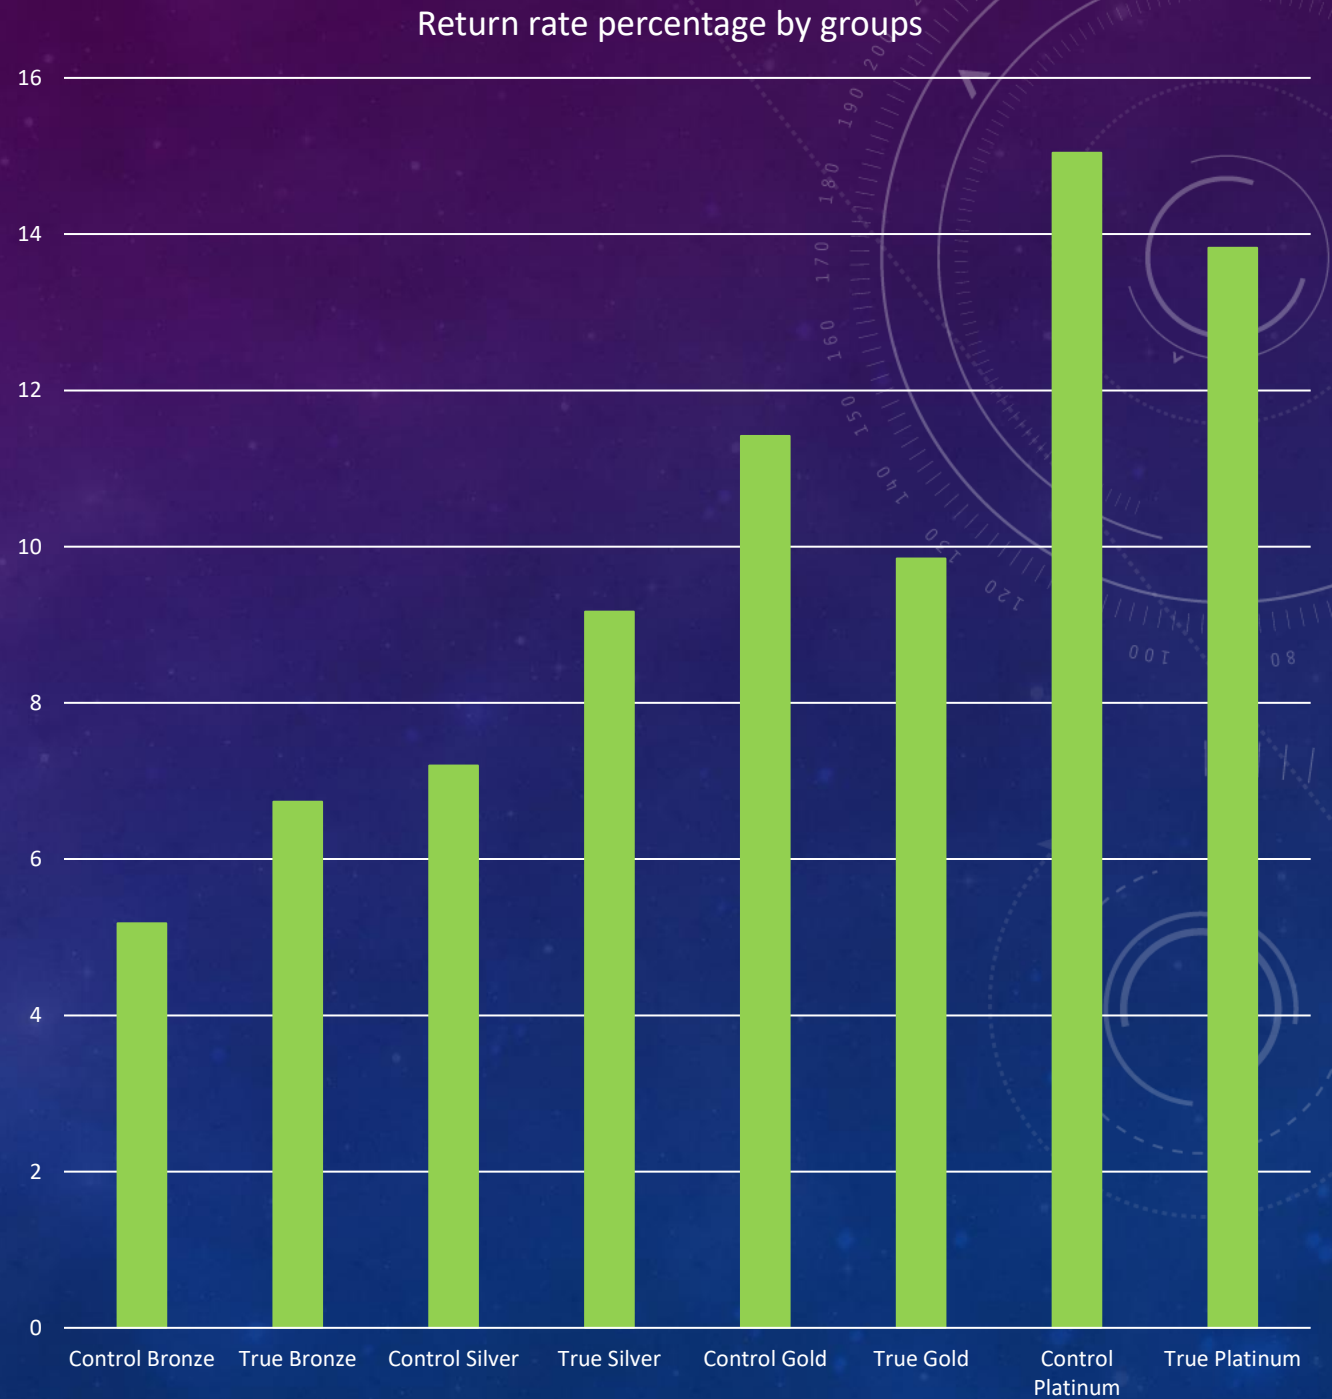

Heavy profit loss at platinum because of high item quantity purchase

RETURN RATE - HIGH AND LOW

Return rate is consistently increasing with higher transactions

Return rate higher than non-members for low-tiers, but is lower for high-tiers

RETENTION RATE

- DOES IT WORK AS A LOYALTY SCHEME?

No difference
with active
customers

Only Bronze-tier is
matching returning
customers with
non-members

Number of active and reactivated customers per group

Percentage of active customers to opted-in total customers per group

SUMMARY & RECOMMENDATIONS

Option 1:

Drop Platinum-tier altogether

Customers can only get up to Gold-tier and its benefits. The estimated revenue increase would be quite strong (<£140000 revenue increase)

Option 2:

Reduce discounts for all tiers

For example, cut by half. Note the discount cost is relatively small even at original and might lose customers and so reduce revenue (£92000 revenue increase with 50% reduced discounts).

**Prism+ is a
diminishing returns
system too reliant
on broad discounts**

Option 3:

Look for alternative methods

Examples include points-based customer loyalty scheme or use targeted personalisation marketing schemes
